

**Amendments To The Claims**

The listing of claims presented below will replace all prior versions, and listings, of claims in the application.

**Listing of claims:**

1. (currently amended) An optical data recording medium, comprising:
  - a light transmittable plastic substrate; and
  - a recording layer formed on said plastic substrate and containing hydrogenated amorphous carbon;

wherein said hydrogenated amorphous material contains 5 to 60 atomic percent hydrogen;  
wherein said recording layer of said hydrogenated amorphous carbon decomposes and releases hydrogen at a temperature greater than 300°C,  
whereas said plastic substrate is softened at a temperature in a range of from 80°C to 300°C so as to permit formation of recesses in said plastic substrate as a result of the hydrogen released by said hydrogenated amorphous carbon; and  
wherein said recording layer is formed on said plastic substrate via plasma assisted chemical vapor deposition techniques by decomposition of a hydrocarbon with a pressure of 20 to 400 50 to 200 milli-Torrs and a substrate bias voltage in a range of from 250 to 550 volts.
- 2-5. (Canceled)
6. (Original) The optical data recording medium of Claim 1, wherein said recording layer has a thickness in a range of from about 30 nm to 2500 nm.

7. (Original) The optical data recording medium of Claim 1, wherein said plastic substrate is made from a resin material selected from a group consisting of acrylic resins, polycarbonate resins, epoxy resins, and polyolefin resins.

8. (Canceled)

9. (Original) The optical data recording medium of Claim 1, further comprising a reflective layer formed on said recording layer such that said optical data recording medium has a reflectivity greater than 40% in response to a wavelength of from 300 to 900 nm.

10-14. (Canceled)
